Duck to S. Sanderling

Long-Term Average Annual Shoreline Change Study & Setback Factors

Updated Through 1998

How to read Setback Factors

Legend

- Inlet Hazard Area (Slight color transparency)
- Inlet Hazard Area Boundary
- Setback Factor Boundary
- Roads

This map is for general information only. The map illustrates average rates of shoreline change over approximately 50 years. The information presented here is not predictive nor does it reflect the short-term erosion that occurs during storms. This map may not be suitable for property-specific determination of erosion rate factors due to its small scale. For a site-specific determination contact your CAMA Local Permit Officer or the regional field office of the North Carolina Division of Coastal Management.
